

***Thank you for your interest in Wellmore Care Coordination***

Care Coordination is a strength-based, family-focused, culturally competent, community based program that utilizes the “*Wraparound*” Model to help families of children with complex behavioral health challenges. Care Coordinators meet with the child and family to conduct a *Strengths and Needs Assessment*, and help them identify a *Family Vision*. They also help the family to identify a Team of *formal and informal supports* and facilitate regular *Child & Family Team (CFT)* meetings to develop and implement the family’s *Plan of Care* with innovative Strategies based on their *Strengths and Needs*.

Care Coordination Programs are available throughout Connecticut. Wellmore Behavioral Health serves the entire Northwest Corner of Connecticut [Region 5], including the Waterbury, Torrington, and Danbury areas.

Referrals are accepted from all sources, including self-referrals directly from families.

Eligibility requirements for Care Coordination services:

- Child/Adolescent is between the ages of birth and 18; 21 if still in school.
- Child/Adolescent is currently diagnosed, or in process of being diagnosed, with a DSM-V mental health or behavioral health disorder.
- Child/Adolescent is involved with services from more than one system.
- Child/Adolescent is at risk for needing a higher level of care.
- Child is **not** currently involved with CT Department of Children and Families (DCF) – or DCF is in the process of closing or transitioning out of their service.

**Services are also available for Spanish-speaking and Portuguese-speaking families.**

Completed referrals or inquiries may be forwarded to:
